### INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No.

PCT/GB 03/04264

I. Ba	sis	of	the	rer	ort
-------	-----	----	-----	-----	-----

1. With regard to the **elements** of the international application (Replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report since they do not contain amendments (Rules 70.16 and 70.17)):

	Des	scription, Pages	
	1-13	3	as originally filed
	Cla	ims, Numbers	
	1-27	7	received on 27.05.2004 with letter of 24.05.2004
	Dra	wings, Sheets	
	1/4-	4/4	as originally filed
2.			age, all the elements marked above were available or furnished to this Authority in the ternational application was filed, unless otherwise indicated under this item.
	The	ese elements were av	ailable or furnished to this Authority in the following language: , which is:
		the language of a tra	anslation furnished for the purposes of the international search (under Rule 23.1(b)).
		the language of publ	lication of the international application (under Rule 48.3(b)).
		the language of a tra Rule 55.2 and/or 55.	anslation furnished for the purposes of international preliminary examination (under 3).
3.	Witl inte	h regard to any <b>nucle</b> rnational preliminary	eotide and/or amino acid sequence disclosed in the international application, the examination was carried out on the basis of the sequence listing:
		contained in the inte	rnational application in written form.
		filed together with th	e international application in computer readable form.
		furnished subsequer	ntly to this Authority in written form.
		furnished subsequer	ntly to this Authority in computer readable form.
		The statement that t in the international a	he subsequently furnished written sequence listing does not go beyond the disclosure application as filed has been furnished.
		The statement that the listing has been furn	he information recorded in computer readable form is identical to the written sequence ished.
4.	The	amendments have r	esulted in the cancellation of:
		the description,	pages:
		the claims,	Nos.:
		the drawings,	sheets:

5. 🛘	This report has been established as if (some of) the amendments had not been made, since they have been considered to go beyond the disclosure as filed (Rule 70.2(c)).					
	(Any replacement sheet containing such amendments must be referred to under item 1 and annexed to the report.)					

6. Additional observations, if necessary:

V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N) Yes: Claims 1-27

No: Claims

Inventive step (IS) Yes: Claims 1-27

No: Claims

Industrial applicability (IA) Yes: Claims 1-27

No: Claims

2. Citations and explanations

see separate sheet

# INTERNATIONAL PRELIMINARY International application No. PCT/GB 03/04264 EXAMINATION REPORT - SEPARATE SHEET

#### Re Item V

Reasoned statement with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

#### Independent claim 1

Independent <u>claim 1</u> appears to meet the requirements of the PCT in respect of novelty and inventive step.

Closest prior art: From the document WO 97/42094 A (D1), a packaging for a premium item is known. D1 discloses a packaging comprising three layers of a material, a first layer and a second layer being laminated to one another and having co-terminal peripheries, wherein the second layer has at least one portion thereof removed for defining a void inside the packaging, the third layer being laminated to the opposite side of the second layer to the first layer.

**Problem**: The technical problem to be solved may be regarded as how to provide an easy to manufacture packaging that can be opened easily.

**Differences with the prior art**: The subject-matter of claim 1 differs from the known packaging in that the three layers of the packaging are each of an <u>equal thickness</u>, and in that the packaging is a <u>snap-apart</u> packaging having partial <u>cut lines</u> to allow a first section of the packaging to be snapped away from the second section of the packaging to provide access to the void.

**Inventive step**: None of the available documents shows or suggests the differences with the closest prior art as cited above.

DE 927 529 A (D2) discloses a <u>two</u> layers packaging having cut lines to open the packaging.

However no third layer having a void therein is suggested.

If GB 2 287 689 A (D3) discloses a packaging comprising three layers of an equal thickness, these are not laminated one to the other. Furthermore this packaging is not a snap-apart packaging.

A skilled man would not combine the teachings of the above mentioned documents to arrive to the subject-matter of independent claim 1.

## INTERNATIONAL PRELIMINARY International application No. PCT/GB 03/04264 EXAMINATION REPORT - SEPARATE SHEET

#### Independent claim 18

The special technical features, representing the contribution over the prior art, of claim 1 have been cited above. These features are <u>essential</u> features of the invention and thus have to be <u>explicitly</u> present in independent claim 18 (<u>Article 6 PCT</u>). In particular, although it is claimed that the three layers are provided as a "single blank", this does not mean necessarily that the blank is of one <u>equal thickness</u>.

#### Independent claim 26

Independent claim 26 should also contain <u>explicitly</u> the special technical features, representing the contribution over the prior art, of claim 1.

#### Certain defects in the international application

Contrary to the requirements of <u>Rule 5.1(a)(ii) PCT</u>, the relevant background art disclosed in the documents D1 and D2 is not mentioned in the description, nor are these documents identified therein.

Independent claim 1 is not in the two-part form in accordance with Rule 6.3(b) PCT, which in the present case would be appropriate, with those features known in combination from the prior art (document D1) being placed in the preamble (Rule 6.3(b)(I) PCT) and with the remaining features being included in the characterising part (Rule 6.3(b)(ii) PCT).

The features of the claims are not provided with reference signs placed in parentheses (Rule 6.2(b) PCT).

Finally, the description should be adapted to disclose the invention as claimed (<u>Rule 5.1(a)(iii) PCT</u>).
